

Covid-19 Statement

JDM Food Group Ltd, you trust us not only to work with you professionally as business partners, but to do so safely, comfortably, and responsibly. Today, as the world continues to come to terms with an unprecedented health scare in COVID-19 (Corona virus), these values are more important to us than ever. Therefore, we'd like to take this opportunity to share some insight into the different steps that we are taking to continue to meet and exceed the highest standards of safety and hygiene at JDM Food Group Ltd.

Firstly, all our staff have been briefed about what COVID-19 is, the symptoms and precautions to be taken such as regular hand washing, use of alcohol hand sanitisers, limiting contact with other personnel, maintaining a 2 m social distance and good personal hygiene practises. We have placed additional hand sanitising stations across the site to encourage hand hygiene prior to entering any of our facilities.

Additional staff have been employed to continually clean and sanitise all public areas such as door handles, handrails, tables, vending machine keypads, lockers, door panels as well as increasing the frequency of cleaning of areas such as the bathrooms and canteen.

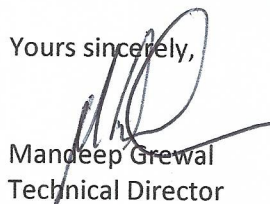

We have installed plasma technology air sanitising and purifying units in areas such as the bathrooms, offices, reception, and engineering to assist in keeping air-borne bacteria/virus levels down.

We have cancelled all internal on-site meetings which are not business critical, stopped non-essential travel and drastically limited visitors to the site. For those visitors or contractors whose visit is critical, they are required to complete the JDM visitor health questionnaire and have their forehead temperatures taken at the point of entry onto site.

Those members of staff who can work from home without a negative impact on the business are being allowed to do so. Members of staff remaining at work are being relocated around the business to allow for the required 2m social distancing to be in place. Where appropriate, partitions are being put up to provide further staff protection.

Our Procurement Department has worked tirelessly to ensure that the supplies of raw materials, packaging and ingredients and supplies of cleaning chemicals, sanitisers are maintained in a healthy position. Stocks of disposable PPE is also being managed closely to allow continued production and supply in a safe, diligent, and ethical manner.

Yours sincerely,

Mandeep Grewal
